**Address:** Flat #102, RVN Residencies, Cyber Hills, Madhapur, Hyderabad - 500081

**Generative & Agentic AI | Machine Learning | Data Engineering | Enterprise Architecture | Cloud & Middleware Architecture | Digital Transformation | Technical Leadership | Delivery Excellence | P & L Management | Vendor Management | Customer Relationship Management | Pre-Sales Handling**

Accomplished professional over 26 years of experience uniquely placed to solve Business Challenges, handle Hands on Technology Leadership with Executive Teams, Development Teams and EA Teams. Targeting to leverage extensive expertise in technology, program management and integration delivery to drive impactful results in product-centric organizations, especially within the IT Product, Health care, pharmaceutical industries in Hyderabad.

## PROFILE SUMMARY

- **Technical Leadership:** Expert in architecting and implementing scalable middleware and integration frameworks across platforms like Kafka, WebSphere, and Java Spring Boot, driving innovation in enterprise connectivity.
- **Stakeholder Management:** Skilled in aligning diverse business and technical stakeholders, ensuring clear communication and collaboration that supports project success and strategic objectives.
- **Delivery Excellence:** Consistent track record of delivering complex projects by building high performing teams producing quality outcomes under tight deadlines with CSAT scores of 97.4 % and above.
- **Digital Transformation:** Proven capability to lead large-scale cloud and automation initiatives involving AWS, Salesforce, and robotic process automation to enhance operational agility and efficiency.
- **Governance and Compliance:** Skilled in implementing robust technical EA governance frameworks, including leading and constituting ARBs to ensure secure, compliant, and controlled enterprise environments.
- **Team Leadership & Mentorship:** Experienced in building and mentoring high-performing, cross-functional teams across multiple geographies, fostering collaboration and skills growth to meet evolving business needs.
- **Industry Domain Expertise:** Deep knowledge of Healthcare, Pharmaceutical and investment banking sectors, applying domain-specific insights to tailor integration strategies that align with regulatory and operational requirements.

## CORE COMPETENCIES

- Strategic Program Management
- Delivery Management
- Digital Transformation Initiatives
- Stakeholder Engagement Strategies
- Risk Mitigation Techniques
- Agile & Scrum Methodologies
- Enterprise and Solution Architecture
- Pre-Sales & Client Engagement
- Business Process Optimization
- Change Management Frameworks
- Cross-Functional Technical Leadership
- P&L / Budget Management
- Financial Planning & Cost Optimization
- Revenue Growth & Profitability Optimization

## TECHNICAL SKILLS

- Generative and Agentic AI, RAG, Machine Learning, LLM Fine Tuning, Open Source LLM Hosting
- Cloud Platforms (AWS, Azure, Google, Private Cloud)
- Enterprise, Solution, Business and Data Architecture
- Data Engineering (Snowflake, AWS Glue, Kafka, Athena, Denodo SQL, No SQL, Graph & Vector DBs)

## EDUCATION

### Masters in Computer Science with 3.94/4.0 GPA

Southern University and A & M College, Baton Rouge, Louisiana

2003-2004

## CERTIFICATIONS

- [TOGAF](#)
- MULTIPLE AWS & GOOGLE CLOUD TRAININGS
- GO LANGUAGE, TERRAFORM & UI PATH RPA CERTIFICATION

## ONGOING PATENT WORK & ARTICLES

- Provisional Patent Awarded in USA for Health Care Rating Improvement System using Generative and Agentic AI
- Patent Application in Progress for Concierto Modernize application in Trianz

## WORK EXPERIENCE

### Trianz | AI Solutions Architect | Concierto Suite of Products | Dec 2024 – Present | Hyderabad, India

- Spearheading the Generative and Agentic AI implementation at Trianz in their Concierto Suite of Products – Concierto Migrate, Manage and Modernize.
- I have done extensive work on Modernize Platform to automatically analyze Legacy Code bases and generate a Detailed Technical Analysis, Technical Summary, Business Summary, Business Architecture & Technical Architecture diagrams for any existing code.
- Designing & Implementing Agentic AI Framework for AI Operations in Production for various clients in the Concierto Manage Platform
- Driving end-to-end engagement, stakeholder governance, KPI tracking, and data-driven reporting with weekly and monthly cadence.
- Architected and deployed integration operating and governance models to enforce technology quality standards and maximize API reuse.
- Designed and Implemented Agentic AI Solution with RAG to automatically Generate Terraform and Ansible Code for deploying to AWS, GCP, Azure or Multi Cloud Deployments.
- Designed and Implemented Solution to automatically analyze existing Database schemas in SQL/ NO SQL and Graph Databases to automatically generate ER Diagrams, Database Business flow Diagrams, Detailed Technical Analysis, Technical Summary and Business Summary of the databases using the schema exports in multiple formats.
- Identifying, escalating, and mitigating issues, risks, and dependencies in collaboration with key stakeholders.
- Led the development teams which enabled Generative AI adoption within Trianz in all areas like Development, Testing and Operations support.
- Working towards Data Preparation, Fine Tuning and Developing a Custom LLM for the Concierto Suite of Products.

### **MatrixConsultants.ai | Enterprise Architect | Jul 2024 – Dec 2024 | Hyderabad, India**

- Designed and developed a product to improving Healthcare quality – mainly in Medical Adherence in patients diagnosed with Chronic medical conditions like Cardiovascular diseases, Diabetes, Hypertension, Blood Pressure and Cholesterol.
- Built models to predict the probability of re-admission and provide guidance on preventive measures for improving the health of the patients and prevent recurrence of episodes.
- Provide actionable intelligence to the Health Information exchanges and their customers for implementing better health care quality and improving the HEDIS rating of their customers.
- Led Pre Sales and Technical Delivery along with architecture, design and development of the product using Generative AI.
- Implemented the pilot in two Health Insurance Exchanges and customized the product towards their requirements.

### **SID Global | Enterprise Architect | April 2024 – Jul 2024 | Hyderabad, India**

- Led Team of Architects to perform discovery at customer in Bahrain for their digital transformation journey.
- Analyzed the Application Landscape, Data Architecture, Security Architecture, Infrastructure Architecture and Datacenter at Bahrain.
- Provided detailed Roadmap and recommendations for digital Transformation and AWS Migration for the customer
- Led Multiple RFP responses and Pre-Sales efforts at SID Global in APAC Region.

### **Career Break | Family Caregiving | October 2023 – April 2024 | Hyderabad, India**

- Took Personal Time off to take care of elders in the family.

### **Virtusa | Senior Director, Health Care & Life Sciences | June 2021 – Oct 2023 | Tampa, Florida**

- Led the AWS COE for Health Care and Lifesciences at Virtusa for Machine Learning and Generative AI.
- Provided Technical Leadership, Architecture and Management to 16 Projects simultaneously – on Natural Language Processing, Machine Learning, Generative AI, AWS Neptune Graph Database, Apache Airflow, AWS Migration, AWS Glue, Salesforce and AWS Quick sight.
- Generated new Revenue to the tune of 15.6 million by converting 8 POC's to full-blown long-term projects from various clients.
- Consistently Maintained a CSAT Score of 97.8 % and above for 3 years.
- Delivered Consistent results in RFP Conversions with a conversion rate of 73.9 % (17/23) for three years in generating new clients and new revenue streams.
- Maintained a healthy profit margin of over 69 % in all the 16 projects handled.
- Successfully turned around a potential lawsuit situation with a client to a successful project while generating new revenue of 1.4 million from the customer following increased customer satisfaction.
- Implemented Architectural Governance and Coding Standards across the Health Care and Life Sciences segment of Virtusa with the support and appreciation of the C level Executive Suite.
- Key Contributions led to Virtusa winning the AWS Global Partner of the year award in Data Analytics for the year 2022.
- Led numerous pioneering initiatives at various Health Care and Pharmaceutical clients – like implementation of Machine Learning and RPA in automated Claims adjudication and implementation of Machine Learning in Clinical Trials Audit Processes.
- Was Responsible for implementing multiple new AWS MAP Funded initiatives at various customers and worked with AWS Proserv.

### **Citius Tech | Consultant Enterprise Architect | Oct 2020 – May 2021 | Hyderabad, India**

- Delivered enterprise architecture roadmaps for multiple clients, implementing Kafka and Snowflake architectures.
- Led teams to modernize legacy databases and migrate them to Snowflake, ensuring near zero downtime.
- Spearheaded the implementation of Snowflake, Kafka, Denodo, and Matillion at a major client.
- Authored numerous RFP's and Technical Proposals for multiple clients.
- Implemented Domain Driven Design and Event Driven Architectures at the clients of Citius Tech
- Led the team to implement a Data Lake at one of the major clients of Citius Tech
- Implemented multiple HIPAA X12 Transactions in Edifecs and Websphere message broker and integrated them with the Facets Backend.

### **HCL Global | Enterprise Solutions Architect | June 2019 – Sept 2020 | New York, NY**

- Responsible for reviewing the Security aspects with the Security Teams for the new Project which is establishing the Satellite Radio signals encryption and decryption for the factory partners of the customer.

- Responsible for guiding and mentoring the team in the Implementation of the Canary Deployment Strategy in their releases.
- Responsible for the Architecture of Customer's move from SOA based Architecture on TIBCO ESB to Micro Services in Go Lang, Python & Spring Boot in the new AWS Platform.
- Working with the Executive Leadership team to come up with a plan to reduce the Existing Technology Debt at the customer as it merges with another major Entertainment firm.
- Designed the AWS Key rotation for the AWS Users and worked with the Security teams to establish the best practices for automated AWS Key rotation every 90 days.
- Responsible for performing a deep dive into the existing Order Entry system, the Warehouse Management systems and the ERP Systems to study and upgrade them.

#### **DOT COM Team | Enterprise Solutions Architect | May 2017 – May 2019 | Jacksonville, Florida**

- Delivered the Architectural Road for migration of the enterprise from SOA & Micro Services to Event Driven Architecture using Data Lake Ingestion Frameworks and Kafka Event Bus.
- Delivered the Architecture for implementing the Enterprise-wide data ingestion into the data lake and multi tenancy for the customer.
- Designed the Care 360 Portal in Angular, Node and React – with 56 Restful API calls which interact with the UI via Netflix conductor for the Pharmacy Business Teams.
- Designed the solution to ingest the Electronic Medical Records by integrating with various health care systems in the Provider space like EPIC, CERNER etc in Edifecs.
- Implementation of metrics in Medical Adherence to enable quantitative and qualitative measures in Health Care of the consumers/customers.

#### **Blue Shield of California | Technical Leader | Jan 2014 – April 2017 | San Francisco, CA**

- Implemented the first Micro Services Architecture in Blue Shield - the planned failure rate was 0.0003% over a volume of 4-5 million transactions per Month in all the real time EDI 270/271, EDI 276/277 and EDI 278 Transactions.
- Led the teams through three private Datacenter Migrations for 156 Servers, both Production and Non-Production.
- Implemented multiple HIPAA X12 Transactions in Edifecs and WebSphere message broker and integrated them with the Facets Backend.
- Led teams through various production implementations of multiple integrations with Edifecs, Message Broker, MQ and Facets in Production for all the HIPAA X12 Transactions

#### **Mphasis | Technical Project Manager | Aug 2008 – Dec 2013 | Chennai & San Francisco**

- Instrumental in delivering all HIPAA X12 4010 to 5010 Transactions while migrating also from Seebeyond eGate 4.5.3 to Edifecs and IBM WebSphere Message Broker within 8 months of SOW.
- Responsible for managing the entire EDI Operations and Development Teams at Mphasis for the customer.
- Led the teams through the implementation of multiple projects ICD 10 Project for 270/278 and 837 X12 HIPAA Transactions, 5010 Carry Over Projects and Facets 5010 Projects, NPI Reject Implementation in 837 X12 HIPAA Transactions.

#### **Satyam Computers | Project Lead | Oct 2008 – Aug 2009 | Baton Rouge, LA**

- Implemented HIPAA X12 276/277 and HIPAA 837 Professional Health Care Claims to Facets in Seebeyond EGate.
- Responsible for coordinating with multiple teams including Business and Stakeholder teams to gather the necessary information and guidance.

#### **Infospan Technologies Limited | Project Lead | Oct 2006 – Oct 2008 | Baton Rouge, LA**

- Led teams through implementation of multiple HIPAA X12 Transactions to Facets integration
- Was involved in gathering business and technical requirements and design and development of the requirements.

#### **Technation Consulting Inc | EGate Developer | Sep 2005 – Oct 2006 | Minneapolis, MN**

- Responsible for implementation of HIPAA X12 837 Professional and Institutional Claims in Seebeyond EGate
- Was involved in gathering business and technical requirements and design and development of the requirements.

#### **Sara Software Pvt Limited | Java / J2EE Developer | Mar 1998 – Nov 2002 | Hyderabad**

- Worked on numerous Java / J2ee Projects for Various clients of Sara Soft.
- Responsible for the implementation and development of the requirements.
