

Ravi Prasad Vangala

Technology Executive — Senior Director / Vice President / CTO

Hyderabad, India | Phone: +91-9392742499 | Email: ravipvangala@gmail.com | LinkedIn: [Ravi Vangala](#)

EXECUTIVE SUMMARY

Accomplished Technology Executive with over 26 years of experience driving Enterprise AI, Generative & Agentic AI solutions, Digital Transformation, Cloud & Middleware Architecture, and Global Program Delivery. Proven track record of linking C-suite strategy directly to hands-on engineering execution, managing multi-million dollar P&L portfolios, and leading cross-functional global teams across IT, Healthcare, Life Sciences, and Banking. Awarded provisional U.S. patent for AI-driven Healthcare frameworks. Targeting executive leadership roles (Senior Director / VP / CTO) in Hyderabad to drive AI innovation and enterprise scale.

EXECUTIVE KPI & BUSINESS IMPACT HIGHLIGHTS

- **Revenue Generation & Conversion:** Generated \$15.6M in new revenue by converting 8 out of 8 GenAI/ML POCs into long-term enterprise projects at Virtusa.
- **RFP Win Rate:** Sustained an exceptional 73.9% RFP win rate (17 out of 23 conversions) over 3 consecutive years.
- **Delivery & Profitability:** Maintained 69%+ healthy profit margins across 16 concurrent complex global projects while preserving 97.8%+ CSAT scores.
- **Productivity & Cost Savings (Trianz Concierto Modernize):** Achieved 80%+ reduction in legacy migration delivery time, 85%+ reduction in team size required, and 96%+ overall cost savings for clients.
- **Mission-Critical Reliability:** Engineered microservices processing 4–5M monthly HIPAA transactions at a 0.0003% planned failure rate and zero downtime at Blue Shield of California.
- **Client Satisfaction & Recovery:** Consistently maintained CSAT scores above 97.4% across all major enterprise accounts; turned around a high-risk client relationship into a \$1.4M expansion engagement.

CORE COMPETENCIES & TECHNICAL MASTERY

Executive Leadership & Strategy:	P&L Management, Strategic Program Delivery, Global Team Leadership, Pre-Sales & RFP Conversions, Architecture Review Boards (ARB), EA Governance
Generative & Agentic AI:	Agentic AI Frameworks, RAG, Custom LLM Fine-Tuning & Steering, Open Source LLM Hosting, LLM Guardrails, Automated Code Generation
Cloud & Data Engineering:	AWS, GCP, Azure, Snowflake, Apache Kafka, Denodo, AWS Glue, Athena, Graph & Vector DBs, SQL/NoSQL Schema Analysis
Enterprise Architecture & Middleware:	Microservices, Spring Boot, Domain-Driven Design (DDD), Event-Driven Architecture (EDA), WebSphere, Edifecs, HIPAA X12 EDI, Terraform, RPA

PATENTS, CERTIFICATIONS & THOUGHT LEADERSHIP

- **Provisional U.S. Patent Awarded:** Health Care Rating Improvement System using Generative and Agentic AI.
- **Patent Application in Progress:** Concierto Modernize Application Framework at Trianz.
- **Professional Certifications:** TOGAF Certified, AWS & Google Cloud Trained, Go Language, Terraform & UiPath RPA Certified.
- **Published Articles:** Authored technical articles on AWS Comprehend NLP, Custom LLM Training, LLM Guardrails Architecture, and Open Source LLM Steering.

PROFESSIONAL EXPERIENCE

AI Solutions Architect | [Trianz \(Concierto Suite\)](#) (Dec 2024 – Present | Hyderabad, India)

- Spearheading Generative & Agentic AI implementation across Concierto Migrate, Manage, and Modernize platforms.
- Architected 'Concierto Modernize' to automatically analyze legacy code bases and generate technical/business architecture diagrams, overviews, and code-level documentation.
- Built Agentic AI Framework with RAG to automatically generate Terraform/Ansible code for AWS, GCP, Azure, and multi-cloud deployments.
- Implemented automated database schema analysis for SQL, NoSQL, and Graph DBs to auto-generate ER diagrams, business flow diagrams, and technical summaries.
- **KPI / Impact:** Achieved 80%+ reduction in legacy migration delivery time, 85%+ reduction in required team size, and 96%+ overall cost savings for clients.

Enterprise Architect | [MatrixConsultants.ai](#) (Jul 2024 – Dec 2024 | Hyderabad, India)

- Architected and developed Generative AI product predicting hospital readmission probabilities for chronic disease patients (Cardiovascular, Diabetes, Hypertension).
- Led pre-sales and technical delivery, piloting and customizing the product across two major Health Insurance Exchanges.
- **KPI / Impact:** Enabled Health Information Exchanges to improve healthcare quality metrics and boost customer HEDIS ratings.

Enterprise Architect | [SID Global](#) (Apr 2024 – Jul 2024 | Hyderabad, India)

- Led architectural discovery for a major banking client in Bahrain, evaluating application, data, security, and datacenter infrastructure.
- Formulated comprehensive Digital Transformation roadmap and AWS Cloud migration strategy; drove APAC pre-sales and RFP responses.

Career Break — Family Caregiving (Oct 2023 – Apr 2024 | Hyderabad, India): Took planned personal time off to care for family elders.

Senior Director, Health Care & Life Sciences | [Virtusa](#) (Jun 2021 – Oct 2023 | Tampa, Florida)

- Led AWS Center of Excellence for Healthcare & Life Sciences, directing 16 concurrent projects spanning Machine Learning, GenAI, AWS Neptune, Apache Airflow, and Cloud Migrations.

- Implemented enterprise-wide architectural governance and coding standards across the Healthcare & Life Sciences business unit.
- **KPI / Impact:** Converted 8 POCs to full projects generating \$15.6M in new revenue; achieved 73.9% RFP win rate (17/23); maintained 69%+ profit margin and 97.8%+ CSAT across 3 years.
- **KPI / Impact:** Resolved high-risk client situation, converting potential litigation into a \$1.4M expansion; directly contributed to Virtusa winning AWS Global Partner of the Year (Data Analytics, 2022).

Consultant Enterprise Architect | CitiusTech (Oct 2020 – May 2021 | Hyderabad, India)

- Delivered Enterprise Architecture roadmaps adopting Snowflake, Apache Kafka, Denodo, and Matillion.
- Spearheaded legacy database modernization and cloud migration with near-zero downtime; implemented Domain-Driven Design (DDD) and Event-Driven Architectures (EDA).

Enterprise Solutions Architect | HCL Global (Jun 2019 – Sep 2020 | New York, NY)

- Architected enterprise migration from legacy SOA/TIBCO ESB to AWS Microservices using Go, Python, and Spring Boot.
- Designed automated 90-day AWS Key rotation security architecture and instituted Canary Deployment release strategies.

Enterprise Solutions Architect | DOT COM Team (May 2017 – May 2019 | Jacksonville, FL)

- Delivered architectural roadmap for enterprise migration to Event-Driven Architecture via Kafka and Data Lake ingestion framework.
- Designed Care 360 Portal (Angular, Node, React, 56 REST APIs) and integrated Electronic Medical Records (EPIC, CERNER) via Edifecs.

Technical Leader | Blue Shield of California (Jan 2014 – Apr 2017 | San Francisco, CA)

- Architected Blue Shield's first microservices framework handling 4–5M monthly real-time EDI transactions (270/271, 276/277, 278).
- **KPI / Impact:** Maintained planned failure rate of 0.0003% across millions of transactions; successfully migrated 156 servers across 3 private datacenters with zero downtime.

EARLIER TECHNICAL CAREER FOUNDATION

Technical Project Manager / Project Lead / Developer (1998 – 2013):

- Mphasis (2008–2013): Managed EDI operations & development team, migrating HIPAA X12 4010 to 5010 and SeeBeyond eGate to IBM WebSphere/Edifecs within 8 months.
- Satyam Computers & Infospan Technologies (2006–2009): Led teams through HIPAA X12 claims processing and Facets integrations.
- Technation Consulting & Sara Software (1998–2006): Java/J2EE and eGate integration developer across healthcare and enterprise applications.

EDUCATION

Master of Science in Computer Science (GPA: 3.94 / 4.0)

Southern University and A&M College, Baton Rouge, Louisiana (2003 – 2004)
